SUMMARY

Software Engineer with hands-on experience developing backend applications using Java, Spring Boot, REST APIs, and PostgreSQL, with technical internship experience in software automation and UI testing. Strong foundation in data structures, algorithms, object-oriented programming, and problem solving, with 250+ LeetCode problems solved.

EDUCATION

B.E. Electronics and Communication Engineering (2027) **CGPA: 8.06**

KPR Institute of Engineering and Technology Coimbatore, Tamil Nadu

TECHNICAL SKILLS

- **Languages:** Java, C, JavaScript, SQL
- **Backend & Frameworks:** Spring Boot, REST APIs, React
- **Databases:** PostgreSQL, MySQL
- **Computer Science:** Data Structures & Algorithms, Object-Oriented Programming
- **Tools & Platforms:** Git, GitHub, Postman, IntelliJ, VS Code
- **Testing:** Selenium, TestNG

WORK EXPERIENCE

Infosys Springboard **Dec 2025 - Jan 2026**

Java Intern *Remote*

- Built a Spring Boot dashboard to trigger and monitor 15+ automated test cases, displaying pass/fail metrics and failure screenshots.
- Implemented session-controlled login with email OTP verification for secure access to the testing dashboard.
- Developed a Selenium-based automation framework using Page Object Model (POM) with TestNG for structured UI testing.
- Automated functional test scenarios for OrangeHRM and The Internet Herokuapp covering A/B Testing, authentication flows, dynamic elements, and DOM interactions.
- Configured parallel test execution using TestNG suite runners, reducing regression execution time.

PROJECTS

Logistics Billing Management System **[Github]**

- Developed a backend-driven billing management system to streamline daily logistics transactions and record keeping.
- Implemented configurable bill identification logic adaptable to business-specific numbering requirements.
- Built RESTful endpoints for creating, updating, retrieving, and deleting billing records.
- Designed a web-based dashboard to manage bills and view transaction records efficiently.
- Integrated Excel report export functionality for easy bill sharing and documentation and automated email reporting to send monthly billing summaries.
- Structured the application using MVC architecture for modularity and maintainability.

(Tech Stack: Java, Spring Boot, PostgreSQL, REST APIs, Javascript, Thymeleaf)

ResQLink **[Github]**

- Built a backend-integrated accident monitoring system that processes real-time HTTP signals from ESP32 devices.
- Designed secure authentication with encrypted password storage and a personalized dashboard for managing device IDs and emergency contacts.
- Integrated Twilio telephony API to automatically trigger voice calls and sends sms with location to registered contacts upon detecting accident events.
- Implemented REST endpoints to log accident data (GPS coordinates and timestamps) and display structured event history for users.

(Tech Stack: Java, Spring Boot, Twilio API, PostgreSQL, REST APIs, Thymeleaf)

CODING & PROBLEM SOLVING

- Leetcode: 250+ Problems Solved
- HackerRank : SQL: Intermediate , SQL: Basic, Problem Solving: Basic
- Codeforces
- GeeksForGeeks
